PERSONAL PROJECTS

Blogging Website

- Developed a front-end of a Blogging Website using HTML ,CSS, BOOTSTRAP and JAVASCRIPT . This blogging website will enable the user to create and publish his own articles/posts, register a new user, edit an already existing blog post, add comments on that blog post, add a "like" to any particular blog post.
- <https://github.com/Nikita711/blogging-Project>

Map App

- The project is created with React.js , node.js,Express and mongoDB . App detects users location (from browser or IP) Guests of the website can leave a message and a pin will be added to the map with the users location and message .

Rock paper and scissor

- Rock paper and scissor is a simple game with plain design and is made with HTML , CSS and JAVASCRIPT .
